

How testing is evolving in DevOps...

...and how shall you evolve yourself

Szilard Szell
DevOps Transformation Lead

szilard.szell@eficode.com

Agenda

- Intro
- DevOps, the 3 ways and how
 Testing fits
- How testing is evolving in DevOps and how should you
- Sum it up

Introduction

Who we are? Who I am?

Eficode expertise

Eficode ROOT DevOps platform

Digital services development

Atlassian solutions

Szilard Szell - in a nutshell

- Transformation lead at Eficode
- Long 19 years in NOKIA
- LEGO and Certification collector
- Voluntary in Hungarian Testing Board
- Voluntary in ISTQB
- PC member of Conferences UCAAT, HUSTEF, and EuroSTAR2021
- Proud father of a 12 years old teenager

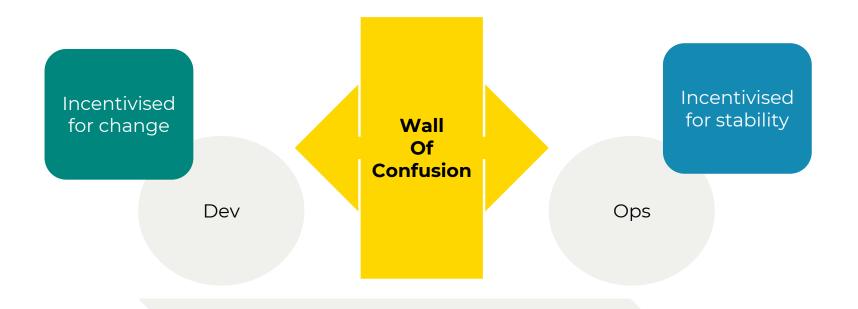

What Testing in DevOps means for you?

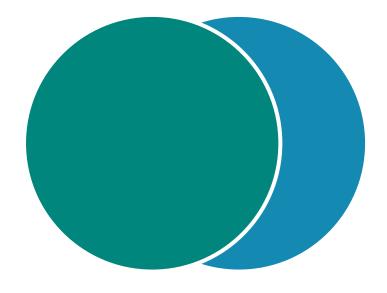

The Chronic Conflict

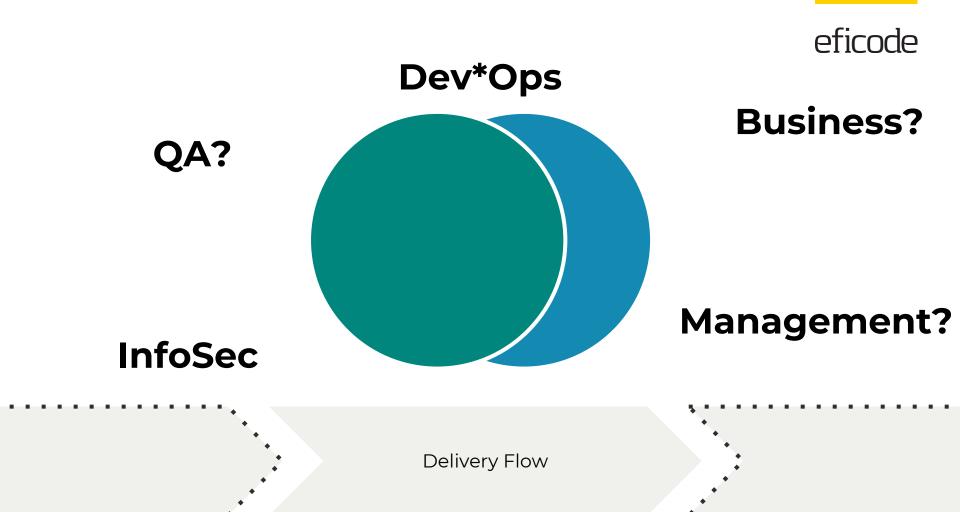

Delivery Flow

DevOps

Delivery Flow

1. The First Way: The Principles of Flow

Business Dev

Customer Ops

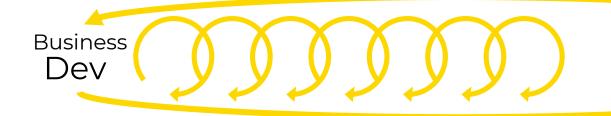

2. The Second Way: The Principles of Feedback

Customer Ops

3. The Third Way: The Principles of Continual Learning and Experimentation

Testing in DevOps

Or shall we say Quality Assistance?

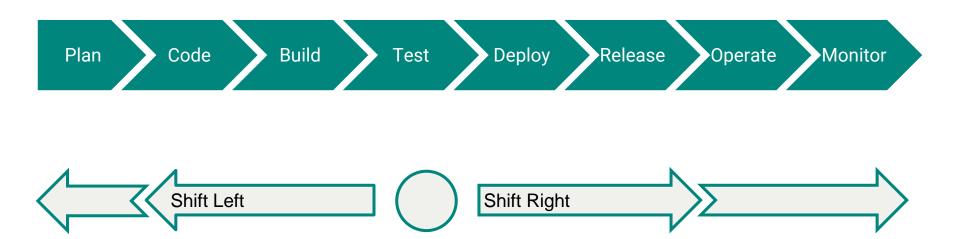

The development value stream

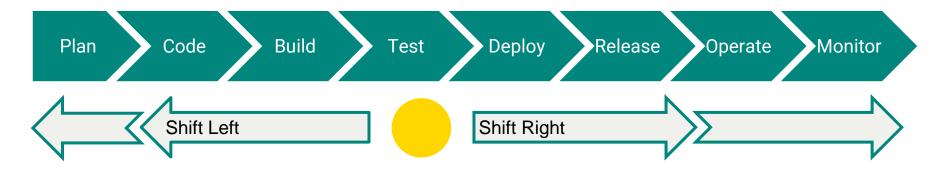

Testing in the value stream

Test

Continuous Testing

Keyword Driven Test Automation

Exploratory Testing and Bug hunting

Continuous Non-functional testing

Continuous Non-functional testing

ility (English)

Origin & history

From the common suffix of various desirable qualities, e.g. <u>testability</u>, <u>reliability</u>.

Noun

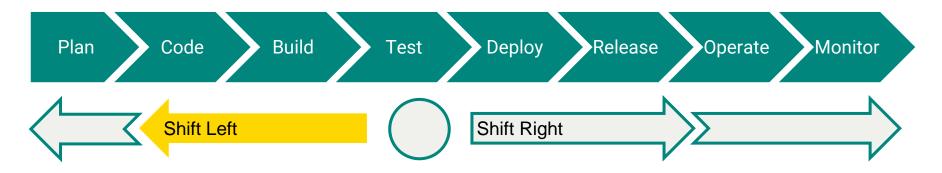

ility (pl. ilities)

 (computing) An <u>abstract quality</u> that good <u>software</u> should exhibit.

Observability

QA during coding

CI/CD pipeline design

TDD/Unit Testing

Code Analysis/Lint

Static Application Security Testing (SAST)

Designing a CI/CD pipeline

QA in live

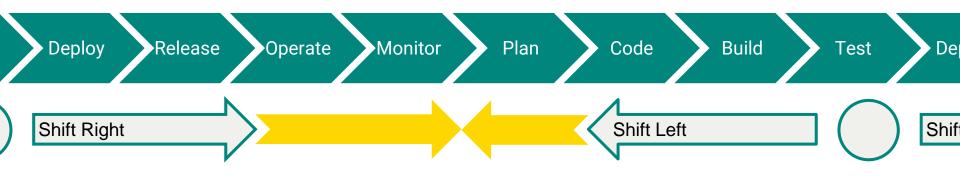

Telemetry and Automatic Roll-back

Observability

A/B Testing

Social Media Monitoring

QA in the infinity loop

Benefit Hypothesis and measurement

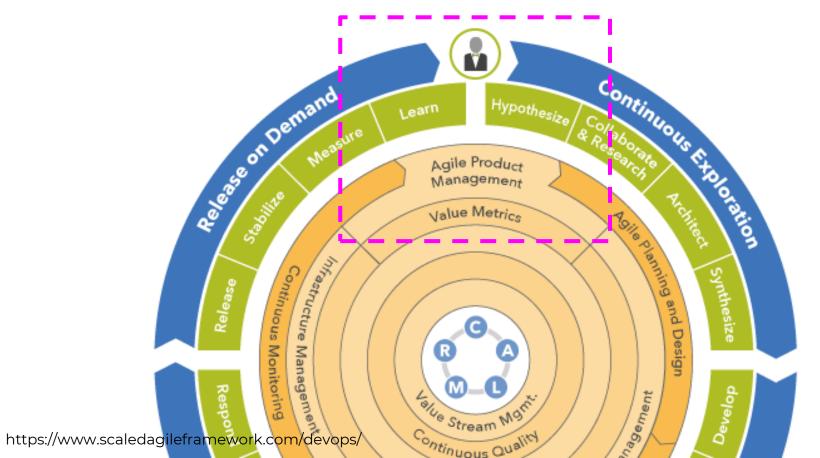

Lean startup thinking

Innovation Accounting

Minimum Viable Product

Continuous Learning and Experimentation

Take away

www.menti.com: 9328 1285

- 1. QA still has a role in all the Three ways of DevOps
- 2. You need to learn a lot of technology and new methods
- 3. There is a lot more both on the left and on the right
- 4. Testing is never boring, especially in DevOps!

What will you learn from tomorrow?

Thank you!
